- [Myrate.com.au](#)

### Myrate.com.au

Everyone wants to save a little money each year. But what if you had an additional \$100,000 in savings?

Allocating just 2 hours of your time could save you around \$100,000 over the life of your loan – simply by reviewing your current financial arrangement and refinancing with MyRate. Myrate.com.au is a multi award winning Internet home loan lender, providing a low cost, full service and feature packed alternative to traditional lenders like banks, building societies and credit unions.

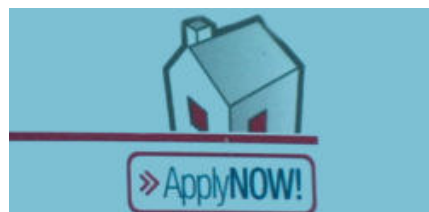

Their current interest rate is 7.19% - that's nearly 1% lower than the advertised rate from the major banks or around \$5,000 a year on a \$300,000 loan! And, there are no fees on standard applications.

So to refinance your existing loan, get on the internet and visit My Rates Refinance Centre where they will help generate a personalised savings comparison of your current loan against a MyRate loan. Then your application will take about 15 – 30 minutes on the phone and when finished MyRate will email you all the relevant paperwork you need to read and sign. Your loan will be approved in five days. So simple!

With MyRate there's no standard application or valuation fee, no legal fees, no settlement fees, no monthly fees, no redraw fees. Their experienced consultants are available to answer any questions or provide any help you may need, and the website is packed full of helpful tips and guides.

So do something about your current situation – the rewards will be endless.

Call **1300 663 558** or visit [www.myrate.com.au](http://www.myrate.com.au) now!
